

DISCUSSION QUESTIONS ABOUT THE
COORDINATION-INTEGRATION ISSUE
October 4, 1999

Does the description dated October 1 accurately describe the issue? If not, how should the description be changed?

There appears to be no dispute that the agencies responsible for administering the listed programs (CVPIA, ESA, etc.) would have the final authority to make decisions about the specifics of those programs. Is this correct?

Does the coordination-integration issue really boil down to whether or not the specific requirements of the listed programs (CVPIA, ESA, etc.) will be discussed as part of the Development Team's work? If the answer is yes, what should the objectives of such discussions be?
